### WORK EXPERIENCE

#### Acute Care CNA

Straub Medical Center

2017 - current / Honolulu, HI

- Tracked vital signs with a 98% accuracy rate, promptly reporting any abnormalities to the nursing staff.
- Applied hydrocolloid dressings to wounds according to established protocols and reduced infection rates by 32%.
- Monitored bed alarms and quickly responded to prevent injuries in high-risk patients, **decreasing fall rates by 44%**.
- Provided emotional support to patients and their families to achieve a 98% satisfaction rate for the quality of care.

#### Home Health Aide

HiHomeCare

2013 - 2017 / Honolulu, HI

- Assisted a caseload of 11 patients with daily living activities to **improve their quality of life by 78%**.
- Utilized barcode scanning systems to safely manage patient medications, maintaining a 99.8% administration accuracy rate.
- Conducted remote patient consultations over Amwell and enabled 64% more accessible care.
- Helped patients with personal hygiene, which lowered their risk of infection by 57%.

#### Patient Care Assistant

The Queen's Medical Center

2010 - 2013 / Honolulu, HI

- Documented patient information in Allscripts to improve communication efficiency among care providers by 42%.
- Operated digital thermometers to record patients' temperatures, quickly identifying fevers for early intervention.
- Accessed evidence-based medical information in UpToDate, which supported informed decision-making that **improved patient care outcomes by 26%**.
- Transferred patients with limited mobility using Hoyer lifts to reduce the risk of patient falls by 38% during repositioning.
