WORK EXPERIENCE

AWS DevOps Engineer

S&P Global

April 2019 - current / Birmingham, AL

- Created and implemented 4 new DevOps pipelines to deliver Infrastructure as Code
- Built workflows to create immutable infrastructure in AWS
- Developed 20+ automations for provisioning compute instances and storage
- Developed 4 Ansible playbooks and automated the execution of routine Linux scripts
- Provisioned resources in AWS using Cloud Formation Templates
- Interacted and communicated with 10,000+ global customers, business users, and IT staff

AWS DevOps Engineer

Jefferson Frank

June 2016 - March 2019 / Tuscaloosa, AL

- Implemented technical solutions for customer engagements as part of an 8-member team
- Helped 500+ customers shape their journey to adopting the cloud, providing customers with technical and strategic support on their "cloud journey"
- Consulted, planned, designed, and implemented cloud solutions with 500+ customers
- Developed 150+ customer technology roadmaps to convey customer developmental needs
- Created 2 self-service account frameworks, 1 self-service environment framework, and 1 self-service pipeline framework
- Analyzed infrastructure and developed utilization reports, presenting to 6 stakeholders and 4 senior managers
