WORK EXPERIENCE

Senior Associate Dentist

Aspen Dental

📅 2015 - current

📍 Seattle, WA

- Saw 12-15 patients a day, with 85% of patients requiring advanced or complex restorative care
- Recommended use of the iTero scanner, which increased patient retention by 30% due to higher engagement
- Collaborated with hygienists daily to develop treatment plans to ensure consistent communication with patients
- Placed emphasis on listening to each patient, answering questions, and helping them make informed decisions, especially regarding cosmetic care
- Networked with 1.3K dentists in online communities and professional trainings to stay abreast of technological advances, industry knowledge, and development support

Senior Associate Dentist

Wellpath

📅 2012 - 2015

📍 Seattle, WA

- Provided regular dental care and treatment plans for 1K+ youth in local correctional facilities
- Performed, on average, 5 extractions, 9 fillings, and 12 routine examinations each day and 2 root canals each week
- Collaborated with 2 associate dentists and 6 hygienists to offer oral care training to correctional facilities 3 times a year
- Communicated with patients using visuals, easy-to-understand language, and emphasis on consequences of poor oral hygiene, resulting in 22% less extractions

Associate Dentist

United Dental Group

📅 2007 - 2012

📍 Seattle, WA

- Managed schedule of 13-15 patients a day, meeting with staff in mornings to discuss treatment plans for patients
- Administered anesthesia, extracted teeth, restored teeth with fillings, performed root canals and minor oral surgeries, completed cleaning inspections, and assessed x-rays
- Counseled patients regarding best oral care practices and pain management surrounding extractions and surgeries
- Maintained accurate patient files with screenings and notes, updating and organizing the day's charts 1 hour before close
