WORK EXPERIENCE

IT Director

Datadog

2018 - current / Boston, MA

- Directed 60 IT staff across 3 physical offices and 5 remote locations
- Oversaw technical infrastructure with a concentration in network security, performing tests, drafting reports, and collaborating with vendors as needed for installations and upgrades
- Implemented initiatives to save time, costs, and labor, such as recommending updates and new applications, replacing over 500 dated laptops, and designing self-paced virtual workshops for IT staff
- Evaluated and developed department budget of \$10M, remaining under budget by 3% or more each year

IT Manager

Persistent Systems

2016 - 2018 / Boston, MA

- Led 18 techs in installations, upgrades, maintenance, and repairs for telecommunications, networks, and security systems for 800+ employees
- Managed department budget, cutting costs by 21% with the creation of an in-house network for locating specific tools and resources
- Partnered with IT director to design software to expedite work flow and ticketing automation, which saved over 80 man hours per month
- Overhauled outdated IT policies and procedures, and provided mentorship and training sessions for tech team regarding network infrastructure and security

Systems Engineer

Blackrock

2014 - 2016 / Boston, MA

- Presented status and deliverables of SDLC in development of cloud-based software geared toward financial institutions and their clients
- Developed software in cooperation with 7 engineering teammates, and worked with Angular, Spring, Java 11, and Azure Dev Ops

- Expanded knowledge base concerning investing and financial management, and updated software to increase investment functionality by 18% for portfolio supervisors, operations, and reporting groups
