Junior Financial Analyst with two years of progressive experience working with internal teams and clients. Leveraging creative problem-solving and keen attention to detail to complete project-based work timely and accurately resulting in decrease in overhead, increase in reporting accuracy, and decision-making delivery faster. Seeking a Financial Analyst role with a growth-mindset company.

## Work Experience

### Invesco - Junior Financial Analyst

2021 - current

San Francisco, CA

- Complete in-depth small business valuations, monitor and analyze financial data trends, and prepare new financial models.
- Provide accounting support to a variety of clients with detailed accuracy and customer service excellence.
- Compile group-level KPI reports and support strategic forecasting for clients including dashboard creation.
- Assisted with due diligence for \$40M joint venture, identifying key risk factors and supported forecasting investment viability findings.

### William Blair - Financial Analyst Intern

2020 - 2020

San Francisco, CA

- Supported the financial due diligence of a \$50M acquisition including document organization and report analysis.
- Created a project charter for printing cost projections that led to the decrease of overhead by 17%.
- Review financial statements, complete cost and revenue analysis, and other basic finance reporting including P&L, gross margin, and profitability.
- Assisted with dashboard creation for the executive team for decision making on spending trends.

### GroupOne Trading - Financial Analyst Intern

2019 - 2019

San Francisco, CA

- Provided accounting support to a variety of clients with detailed accuracy and customer service excellence.
- Compile group-level KPI reports and support strategic forecasting for different internal teams and clients.
- Developed an automated process using Excel for the internal team KPI reporting that increased accuracy by 15% and provided the data 2 days sooner to the team leads.
- Review financial statements and provide feedback to clients specifically around cost and revenue analysis.
