EDUCATION

Bachelor's of Science
Computer Engineering
Montana Technological University

- 📅 2006 - 2010
- 📍 Butte, MT

CAREER OBJECTIVE

Ambitious and strategic data engineer with 12+ years of experience working with Java, Python, and AWS. My focus on data integrity and cross-functional integration across all company departments has consistently boosted efficiency by >25% and optimized data pipelines. Looking forward to bringing my skills in management and data analytics/analysis to solve problems, develop new platforms, and construct data pipelines for S&P Global Market Intelligence.

WORK EXPERIENCE

Lumen Technologies

Lead Data Engineer

- 📅 2017 - current   📍 Bozeman, NT
  - Managed 3 BI and data warehousing teams and designed the units to correspondingly scale
  - Defined the processes needed to achieve operational excellence in all areas, including project management and system reliability
  - **Built cross-functional relationships with 24 data scientists**, PMs, and software engineers to understand data needs
  - Drove the design, building, and launching of 4 new data models and data pipelines in production
  - Responsible for 100% of all data quality across product verticals and related business areas

Principal Data Engineer

Billings Clinic

- 📅 2012 - 2017   📍 Billings, MT
  - Implemented and maintained data architecture built around automated ingestion, data security, compliance, and governance
  - Designed the infrastructure required for optimizing extraction and transformation of data using AWS to improve loads by 62%
  - **Liaised with 25+ stakeholders**, including the product, BI, and design teams, to assist with data-related technical challenges
  - Mentored 9 data engineers and 10+ other engineers and business leaders in all aspects of data management

Data Engineer

Advanced Technology Group

- 📅 2010 - 2012   📍 Bozeman, MT
  - Built 4 continuous data pipelines with fault-tolerant architecture
  - Improved and maintained >40% of data infrastructures in AWS
  - Transferred data and events between ATG and 5+ Data Partners
  - Designed and documented 30+ table schemas
