PROJECTS

Healing Hands

Demonstrator

📅 2022

- Analyzed data using Tableau, revealing a statistically significant average pain reduction of 44% post-treatment
- Organized workshops on manual therapy techniques, attracting 23% more participants compared to previous years
- Tracked patient progress over three months post-treatment using WebPT, which **revealed that 59% of patients sustained pain reduction benefits over time**
- Evaluated the impact of manual therapy techniques on different conditions and showed a significant 32% reduction in pain
- Conducted post-treatment surveys with 97% response rate, revealing that 89% of patients reported higher satisfaction levels

Rehabilitation Renaissance

Researcher

📅 2021

- Garnered a 19% increase in engagement on social media platforms after sharing key findings and insights
- Discovered a 21% variance in the utilization of specific techniques between North America and Europe, highlighting the influence of regional healthcare policies
- **Revealed a remarkable 28% decrease in patient recovery time** due to the implementation of advanced therapeutic modalities
- Found that technology adoption has increased by 47% over the last two decades, leading to more precise diagnoses and personalized treatment plans
- Collaborated with a team of three researchers on OSF, contributing 78% of the project's content and coordinating data synthesis

CAREER OBJECTIVE

Driven and dedicated individual seeking a physical therapist Internship at Reliant Rehabilitation to leverage academic knowledge and passion for patient-centered care. Eager to apply classroom learning to real-world scenarios, contribute to a dynamic healthcare team, and further develop hands-on skills.
