Basic Life Support (BLS)

CAREER OBJECTIVE

Nurse Practitioner with experience on the front lines of the Covid epidemic. Looking to transition to a lower risk clinical environment where I can still have a large impact on at-risk patients.

WORK EXPERIENCE

Nurse Practitioner

Housing Works

March 2020 - current / San Diego, CA

- Worked alongside an interdisciplinary team of healthcare providers to provide quarantined housing to homeless individuals experiencing COVID symptoms
- Assessed if residents were able to perform ADLs and were medically stable
- Prescribed medication when appropriate for residents who needed their ongoing medications refilled
- Collaborated with other health care providers in planning interventions to best meet patients' needs in a timely manner and to promote the continuum of care
- Prescribed appropriate laboratory and diagnostic procedures related to patients' health status and facilitated appropriate treatment interventions predicated on results of those procedures
- Performed direct patient care procedures in accordance with agency policies and procedures

Nurse Practitioner

Centers Plan for Healthy Living

August 2010 - February 2020 / San Diego, CA

- Managed members with acute change in condition in collaboration with primary care physician and the ICT
- Prescribed appropriate medications, including controlled substances in accordance with NYS law
- Ordered, reviewed, and followed up with treatments and diagnostic testing
- Communicated with the family and designated representatives regularly about significant changes in patient condition and therapies
- Provided clinical education and support to nursing staff as needed
- Participated in the "on call" program, providing on-site assessments and interventions for patients after hours and on weekends
