CAREER OBJECTIVE

Senior IT manager with experience leading teams to ship customer-focused features and products that have delivered over \$30M of business value throughout my career. Looking for an opportunity to leverage that skill set with Google.

WORK EXPERIENCE

Senior IT Manager

Straight Arrow Products

January 2016 - current / Pittsburgh, PA

- Managed computer systems, hardware, network security, and infrastructure services as the company grew from \$5M to \$25M in annual revenue
- Worked with senior management to scope and build new features and applications which enabled 100% year over year revenue growth
- Set up and maintained WMS & Amazon scanners, which allowed for 100% data redundancy and 0% loss of production data
- Collaborated with 10 team leaders, leading the budgeting process for all IT-related projects
- Implemented regular maintenance and improvements of 8 network servers to improve application speed by 70%

IT Infrastructure Manager

Rimkus

September 2012 - January 2016 / Los Angeles, CA

- Led and delivered the infrastructure capability transformation for 100% of cloud and internal systems
- Evaluated and implemented 37 right-fit industry products and technologies
- Directed the IT Infrastructure team, ensuring 100% of customer tickets were completed on time
- Automated repetitive, manual tasks to save the organization over 200 hours of manual effort each month
- Spearheaded a new vision with 12-person development team, prioritizing user experience and performance for an application with 2,000,000 concurrent users
- Targeted and removed 77 roadblocks, leading prioritization efforts
- Implemented and directed the adoption of 7 new technologies within the company
