### WORK EXPERIENCE

#### Special Education Teacher Assistant

Toledo Public Schools

2020 - current / Toledo, OH

- Personalized learning materials using Kurzweil 3000, contributed to a 39% increase in assignment completion rates.
- Employed Proloquo2Go for 11 students, collectively shrinking 73% of frustration-related behaviors during communication attempts.
- Integrated Learning Ally Audiobook Solution into the curriculum for 18 students with reading disabilities, resulting in a **36% surge in weekly reading engagement hours**.
- Monitored regular progress and tracked student behavior goals outlined in their IEPs in ClassDojo, achieving a 24% rise in goal attainment rates.

#### Special Education Paraprofessional

Columbus City Schools

2018 - 2020 / Columbus, OH

- Assisted students with disabilities during lunch, recess, and transition periods to ensure their safety, resulting in a **92% drop in adverse incidents** during this time.
- Supported students with apraxia of speech through motor speech exercises and drills using Articulation Station, gaining in a 16% boost in speech-motor coordination as measured by assessment scores.
- Analyzed student progress including attendance, grades, and behavior incidents with Illuminate Education's data management system, uplifting overall attendance rates by 22%.
- Organized personalized DreamBox sessions tailored to individual student needs and learning objectives, fostering an average improvement of 1.3-grade levels in math skills.

#### Behavioral Technician

OhioHealth

2016 - 2018 / Columbus, OH

- Used JAWS's text-to-speech functionality to read EMR data aloud, allowing 27 visually impaired patients to independently review their medical records during appointments.
- Implemented a OneNote system for tracking patient appointments for timely follow-ups, lowering events of missed appointments by 17% in the behavioral health department.
- Created 13 behavior modification programs using SMART Notebook, resulting in a 28% reduction in recorded disruptive behaviors among patients.
- Conducted daily behavioral assessments and interventions for 35+ patients, contributing to a **24% decrease in incidents requiring restraint or seclusion**.
